

Injection Alloys Group Wire

Injection Alloys is a UK company with manufacturing and sales business units around the globe. We pride ourselves in being the preferred supplier of trimming and inclusion modification solutions in many parts of the Global Steel Industry. Our team of highly qualified specialists work relentlessly to provide innovative and value adding solutions for our customer needs.

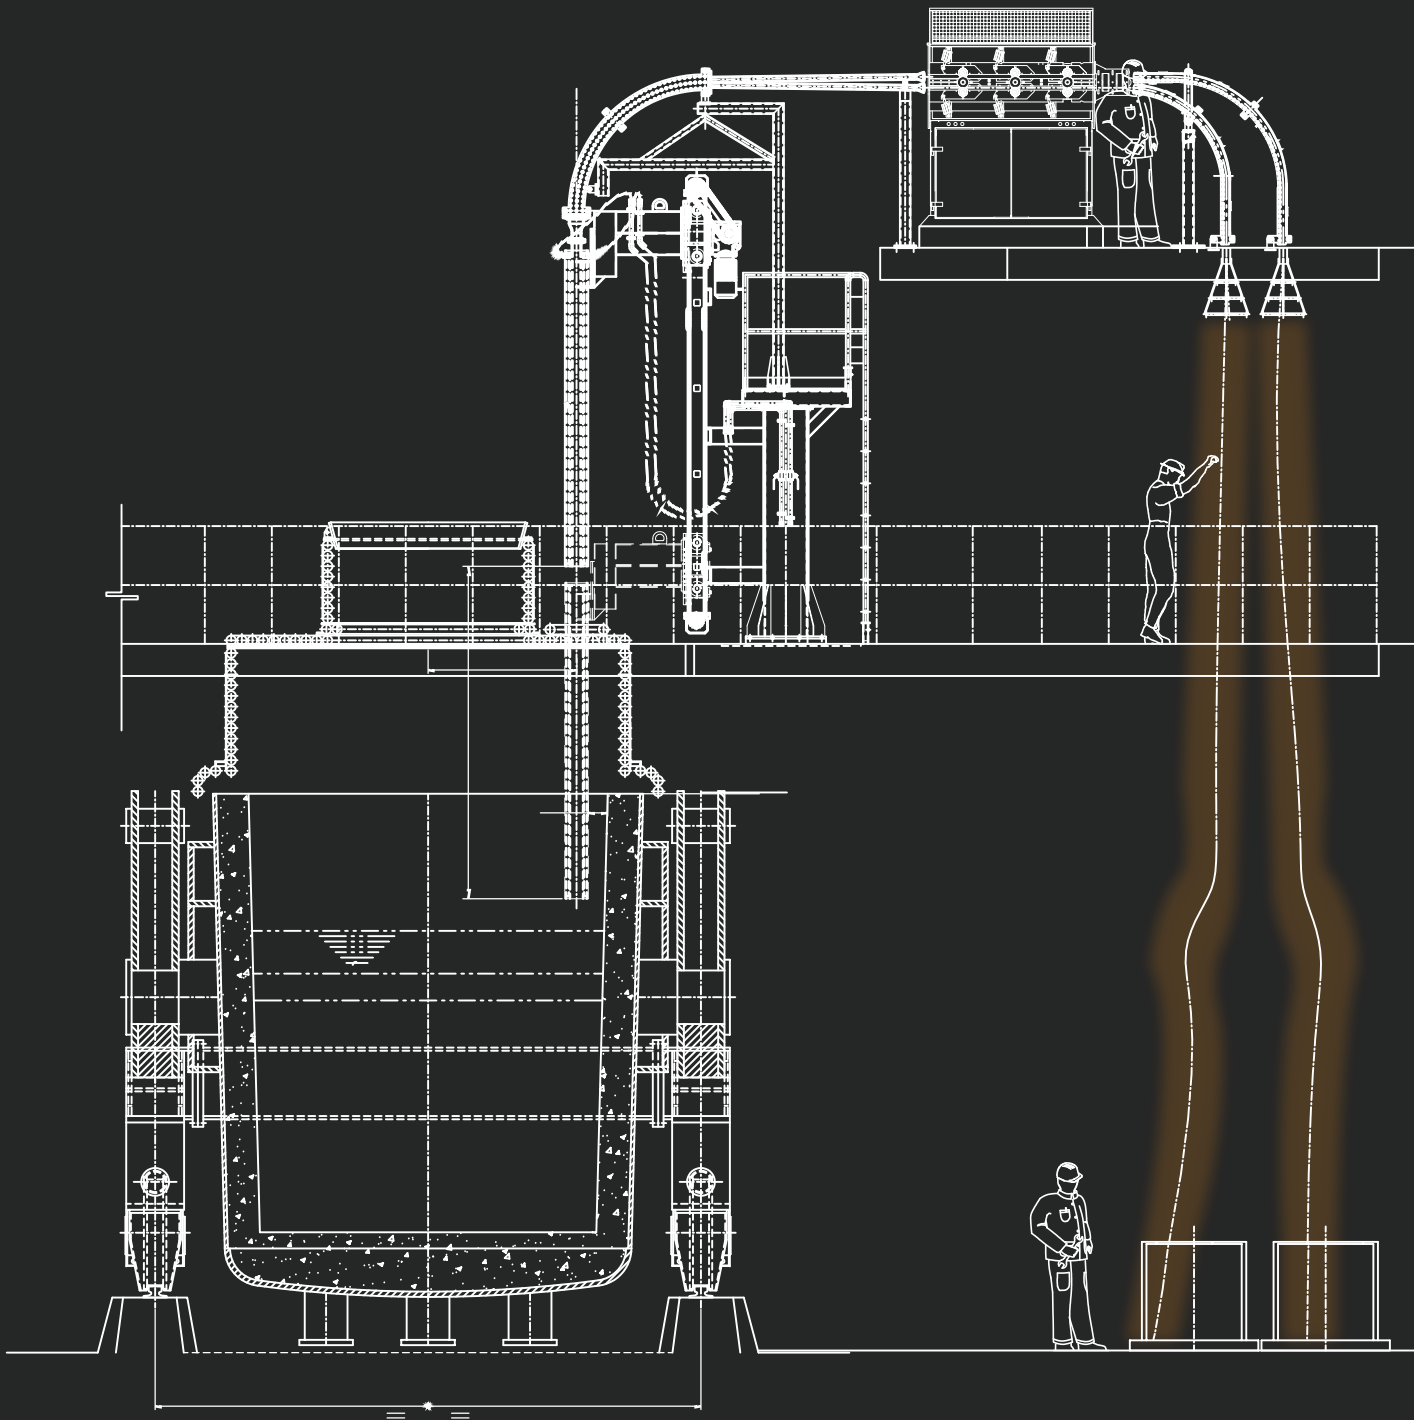

Supporting The Customer

The Injection Alloys approach is to support the customer in every stage of the process and work with you to minimise the total cost of supply / ownership. We always provide technical recommendations to optimise your production time, quality and costs in the Secondary metallurgy stage of the steel making process.

Injection Alloys supplies the widest range of solutions in the industry and will always work closely with the customer in every stage from introduction to final solution.

Hi-Core

Injection Alloys was the pioneer in the development and commercialisation of Ultra-High yield seamless cored wires. Through our patented manufacturing and consumable technology, we have developed a proven range of Hi-Core products that bring unprecedented benefits to the user, including improved yields, reduced splashing and fuming and significantly reduced variation of element ppms. The result is the opportunity for the customer to produce higher quality, cleaner steels, at lower overall cost. Our Hi-Core product range includes Hi-Cal, Hi-FeCa, Hi-FeTi, Hi-CaSi, Hi-FeNb, Hi-FeB, Hi-CaCN2, Hi-CaC2, plus many others upon request.

Standard Cored Wires

Injection Alloys offers the complete range of industry standard products to the high quality and technical specifications that the industry demands. We can offer all diameters that are needed, from 9mm to 16mm as standard, or other variants on request.

Feed Equipment

Injection Alloys has developed a complete range of feed equipment and injection solutions. Please see our Equipment brochure for full details...
